Senior Frontend Developer

I am a proficient Senior Front-End developer. I have honed my skills in Angular and ReactJS. My proficiency in backend technologies such as Express, and NodeJS complements my front-end skills. My career journey has been enriched by diverse projects spanning different industries like e-commerce, fintech, healthcare, semiconductors, and FMCG. I bring a solid foundation in front-end development coupled with a deep understanding of back-end technologies, making me adept at crafting robust and innovative solutions across various industries.

Skills

- | | | |
|---------------------------|-------------------|-------------------------------|
| • React.js | • Angular | • Material UI |
| • Next.js | • Redux | • PrimeNg/Angular Material |
| • Javascript | • RxJS | • Responsive Web Design |
| • TypeScript | • API Development | • Core Web Vitals |
| • HTML/CSS/SCSS | • Version Control | • Cross-Browser Compatibility |
| • TailwindCss/Bootstrap 5 | • GraphQL | • Performance Optimization |

Experience

Senior Frontend Developer, Retail Direct Group

July 2024 – Present

As a senior front-end developer, my job is to spearhead E-Commerce development projects, providing leadership and guidance to developers, collaborating between cross-functional teams (designers, backend engineers, SEO experts, etc.) as well as performing audits for performance and scalability. Specializing in React.js, Next.js, Angular, I focus on crafting user-centric solutions that optimize online shopping experiences and drive revenue growth.

Accomplishments:

- Migrated **LaptopOutlet** from Magento CMS to a modern React/Next.js architecture, implementing Redis-based caching and advanced performance optimizations to deliver a fast, scalable, and SEO-friendly experience.
- Successfully migrated, enhanced and updated company's flagship store, **Box.co.uk** from Magento CMS to Angular 17 which made over 1 million GBP in revenue during the sales campaigns of 2024.
- Planned the sales campaigns (Black Friday, Cyber Monday, Christmas Sale, January Sale) of 2024 while collaborating with Marketing, SEO, Content, and QA teams
- Successfully implemented strategies to enhance performance and user experience for E-Commerce sites. Strategies include Redis caching, Service worker configuration, Server Side Rendering, and more
- Owned the frontend development of the UK's premier PC and hardware retailers, The Box

and **LaptopOutlet**, leveraging cutting-edge technologies and advanced software solutions.

Software Engineer, Invobyte

Sept 2020 – June 2024

I started my journey as an Associate Software Engineer and, over time, grew into the role of Software Engineer before eventually leading a team of 3 as a Team Lead. Along the way, I worked on designing and building scalable web applications while making sure they were efficient and reliable. I had the opportunity to work closely with premium clients from the US and UK, taking full ownership of their projects and ensuring their needs were met with the right solutions. Part of my role also involved handling deployments and managing servers with Nginx and Apache, which gave me a chance to see projects through from start to finish.

Accomplishments:

- Led the successful transformation of **SkyWater's** 1980s terminal-based Manufacturing Execution System into a modern web application using React.js and Java Spring Boot, enhancing usability and scalability.
- Directed the delivery of the Complaint Management System for **Dydo Drinco**, coordinating efforts across teams to ensure timely deployment and client satisfaction.
- Independently developed the SkyWater Customer Portal, streamlining semiconductor project requirement gathering and reducing communication time by **50%**.
- Designed system architectures for multiple new projects, ensuring scalability, maintainability, and alignment with client requirements.
- Provided hands-on technical support to team members, resolving complex issues and enabling faster sprint progress.
- Trained and onboarded new hires, accelerating their integration into the team and improving overall productivity.
- Led sprint planning and backlog refinement sessions with product owners, aligning development priorities with business goals and ensuring timely delivery.
- Implemented performance optimizations and bug fixes across multiple platforms, improving efficiency, system responsiveness, and overall stability.
- Managed and mentored a team of **3 engineers**, fostering collaboration, accountability, and technical excellence to deliver high-quality solutions for premium clients in the US and UK.

Education

University of the Punjab, Masters in Information Technology

Sept 2019 – Sept 2021

- CGPA: 3.19/4.0
- **Coursework:** Software Engineering, Software Design and Architecture, Analysis of Algorithms, Enterprise Resource Planning, Enterprise Software Development

Technologies

Languages: Javascript, TypeScript, HTML, CSS, SCSS

Technologies: React.js, Next.js, Angular, Node.js, Express.js, GraphQL
